As a passionate and dedicated Web developer with a strong foundation in programming and a thirst for learning, my objective is to kickstart my career in Web development by joining a dynamic and innovative team. I aim to leverage my academic knowledge, coding skills, and enthusiasm to contribute effectively to projects, while continuously expanding my skill set and making valuable contributions to the organization's success.

Projects

● Personal Website or Portfolio:

- A personal portfolio website is a web application that showcases an individual's work, skills, accomplishments, and experiences. It serves as a hub for presenting a person's professional identity to the online world.
- In this web application, I used HTML5, CSS3 & Basic JavaScript & also some sort of Media Query to make it a responsive. Website - www.Royalkaran.tk

● Calculator

- It is a web application with help of Spring, Hibernate and HTML/CSS. The journey is about how to create a backend web application. Customer Relationship Manager will keep track of all the customers. Adding new customers, editing their information and deleting them when needed.
- Used Spring Framework, Spring Core, Spring MVC, Hibernate, JDBC, ORM Framework, Maven JSP, MySQL

● Spotify Clone (Music Web APP)

- Spotify clone is a music streaming platform that helps you gain an advantage in the lucrative streaming industry. An app similar to Spotify helps you offer millions of songs of different genres to users. Website - <https://royalkarang.github.io/spotify-Clone/>
- This Clone is created with Frontend Knowledge used HTML5, CSS3 and JavaScript.
